mimio® Interactive – Accessories

Enhance your mimio® Interactive system with mimio® Capture kit, the ultimate tool to digitally capture dry-erase marker content on your whiteboard. Or add new freedom to your mimio® Interactive system with the mimio® Wireless module.

Capture Everything You Write or Draw with mimio® Ink Capture

Add mimio® Capture kit to your mimio® Interactive and you can digitally capture your dry-erase marker work from any whiteboard. Print your board work, email files, export to other applications or use for online meeting content – all these options are easy with mimio® Ink Capture.

With mimio® Capture kit, you can use up to 8 different marker colors and save your files in a variety of formats including PDF, JPEG and HTML. You can also link directly to third party conferencing solutions to share your whiteboard notes with remote locations. In the classroom, the mimio® Capture system helps students stay focused on the lesson, not busy copying board notes.

Box Contents

mimio® stylus (x4), mimio® eraser, Expo® markers (x4), color caps (x8), stylus caps (x4), stylus holder, eraser holder, N-Cell battery (x4), AAA Battery

Get Added Freedom to Teach with mimio® Wireless

Add the mimio® Wireless module to your current mimio® Interactive bar in a snap to get a range of up to 30' (10 m) from your computer. Simply slide out your current USB module and replace with the mimio® Wireless module. Plug the small mimio® Wireless receiver into your computer's USB port and you're ready to go.

mimio® Wireless module and USB receiver

Proprietary Wireless for Simplicity

Requiring no special set up on your computer, mimio's 2.4 GHz CSSS signal transmission technology does not rely on line-of-sight and will not interfere with your existing WiFi network or other wireless devices such as Bluetooth. There's no software to install, just plug and play!

Extras Included

Use the USB extension cable when it's difficult to insert the USB receiver due to close-together USB ports. An AC adapter is also included should you need to power your mimio® Interactive bar without batteries.

Box Contents

mimio® Wireless module, USB receiver, USB extension cable, AC adapter

General system requirements

Microsoft Windows: Pentium II 450 MHz processor, 256 MB RAM (512 recommended), 120 MB free hard disk space, Windows Vista, XP, 2000.

Mac: PowerPC® or Intel processor, Mac OS X 10.3.9+, 512 MB RAM, 200 MB free disk space.

Warranty Information

2 years on all hardware components, extended to 5 years with product registration. See complete details at mimio.com.

Get control of your mimio system from around the classroom – up to 30' (10 m) from the master computer – with new mimio® Pad! See separate information brochure for more details.
